SUMMARY

Fourth-year Computer Science student and Business System Analyst with hands-on experience building full stack web applications, internal business systems, and AI automation workflows. Experienced in translating business requirements into working software, from the interface to the API and database, using Next.js, React, FastAPI, PostgreSQL, and n8n.

EDUCATION

Bachelor of Computer Science

Bina Nusantara University — Aug 2023 - Present

- Specialization in Database Technology
- GPA : 3.23/4.00 (Current)

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, PHP, C, HTML
- **Frontend:** React, Next.js, Tailwind CSS
- **Backend:** FastAPI, Flask
- **Database:** PostgreSQL, MySQL, Prisma
- **DevOps:** Docker
- **AI and Automation:** TensorFlow, n8n
- **Data and Design Tools:** Tableau, Power BI, Excel, Figma
- **Soft Skills:** Project Management, Teamwork, Communication, Negotiation, Critical Thinking
- **Languages:** English, Indonesian

WORK EXPERIENCE

Binus English Club (BNEC) — May 2025 – Present
Staff of Public Relations

- Actively managed external communications and engagement strategies, serving as a primary point of contact for external partners.
- Collaborated within the team to promote club events and activities, directly contributing to enhanced organizational visibility and member participation.

PT. Artha Mitra Interdata — Feb 2026 – Present
Business System Analyst

- Analyzed business processes and worked with technical teams to translate requirements into scalable, data-driven systems and automation workflows.
- Developed an IT consulting company website with Next.js, React, and Tailwind CSS, including a content admin area with two-step sign-in.

- Built an internal Office Automation system for employee data, attendance, leave, reimbursement, and health claims, with tiered approvals and email notifications, using Next.js, TypeScript, PostgreSQL, and Prisma.
- Built an internal penetration testing platform with React, FastAPI, Celery, and PostgreSQL to check company assets for open ports, SSL certificates, and HTTP header issues, and publish PDF reports.
- Engineered automated data scraping and sentiment analysis pipelines with n8n and AI APIs to extract market insights from platforms such as Glassdoor.
- Built an AI automation Telegram bot in n8n that generates images and videos from text prompts and delivers the results in chat.Leveraged modern web technologies (including Next.js, React, and Tailwind CSS) to build integrated system interfaces and improve overall operational efficiency.
